## Striving for Zero Bleeds

### **SPEAKER**

Doris Quon, MD,PHD  
Medical Director

**Tuesday, April 3, 2018**

**6:30PM**

### **Location**

Salty's on Alki Beach  
1936 Harbor Ave SW  
Seattle, WA 98126

**Please Join Us** for this fabulous **FREE** event with delicious food and a great presentation by Shire.

### **RSVP**

If you would like to attend this program, please contact the Mountain to Sound Chapter of AACN by sending an email to [event@mtsaacn.org](mailto:event@mtsaacn.org)

### **PROGRAM OBJECTIVES**

- Provide key results from the clinical study of prophylaxis with Antihemophilic Factor (Recombinant), a randomized comparison of two prophylactic regimens and a paired comparison of on-demand and prophylaxis treatment in patients with hemophilia A.
- Discuss how patient pharmacokinetics (PK) may be used to tailor the prophylactic dose and reduce the frequency of prophylactic dosing in appropriate patients.

### **PROGRAM DESCRIPTION**

Factor VIII prophylaxis is recommended as optimal treatment for preventing joint and other bleeding episodes in adults and children with severe hemophilia A. In this program, we will review the safety and efficacy data for the randomized clinical study that evaluated the use of Antihemophilic Factor (Recombinant) for prophylactic treatment and discuss how PK may be used to personalize the every third day prophylactic regimen for your appropriate patients.
